

# DIVE PALAU 2027

REBREATHER & TECH DIVER FRIENDLY!

SIGN UP HERE

## With Scuba Culture

Technical Diving in Palau is guaranteed to be an incredible and memorable experience, conducted by highly trained instructors from Sam's Tours. This type of diving allows for greater time on and inside the wrecks and exploring areas recreational divers cannot venture into.

Palau is rich in WWII history with numerous warships being sunk in its waters. These wrecks have over the years been taken over by marine life - with nature truly reclaiming its place, these wrecks have become underwater magnets attracting a massive array of marine species.

All levels of technical diving are accommodated, including diving with twin sets and Sidemount divers, various sizes of decompression cylinders, and hang bars for your comfort during decompression stops.

100% O2 and specific O2 blends are available and charged on a per litre basis, Sofnolime for rebreather divers can be pre-ordered.

One thing is for sure... the sound of bubbles is noisy underwater and is responsible for marine animals keeping their distance from divers whereas rebreather divers who have no bubbles, are silent underwater, truly have the edge over the open circuit brigade. Rebreather divers can interact and encounter manta rays at cleaning stations with extended run times and spend copious amounts of time admiring and interacting with these amazing creatures in complete silence.

**FLIGHTS & ACCOMMODATION INCLUDED  
PLEASE SEE MAIN FLYER**

## Dive

### SAMS DIVE TOURS PALAU

Dedicated Tech Boat (Skipper, Vessel, Fuel)  
2 Guides per day (Tech Guide & CCR Guide)  
5 days Tech diving operations  
Weights, FREE 32% banked Nitrox
